Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested:

--A container with a lighting device-- instead of "lightening rod" which appears to be the "trademark". It should not be used in the title of the disclosure.

The use of the trademark has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner, which might adversely affect their validity as trademarks.

### ***Drawings***

2. The disclosure does not include any figure showing the claimed features. We suggest that figures should be included for clear understanding of relative positioning of structural elements including display and illuminating features.

### ***Claim Objections***

3. Claims 1 and 2 are objected to because of the following informalities:

Claim 1, line 2, "may or may not flash" needs to be deleted as it does not serve any purpose.

Claim 2 is necessarily objected because of its dependency on the objected base Claim 1.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 2, "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim 2 is necessarily rejected because of its dependency on the rejected base Claim 1.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Nasgowitz (US Patent No.: 4,077,146).

Regarding claims 1 and 2, Nasgowitz ('146) discloses a receptacle 12 (Figure 1, column 2, line 26) comprising:

- a lighting device 26 (Figure 1, column 2, line 51) incorporated within the receptacle 12; and
- an optical message 22 molded within the transparent material making the receptacle 12 (Figure 1, column 2, lines 65-69).

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Byer (U.S. Patent No. 5,411,140), Tipton (U.S. Patent No. 5,211,699) and Lewis et al. (U.S. Patent No. 5,591,524 B1)

Each of the above-indicated prior arts discloses a receptacle assembly comprising some of the claimed features claimed by the applicant.
